SUMMARY

Backend engineer with seven years of experience designing Python APIs and data-intensive services.

EXPERIENCE

Senior Backend Engineer, Northwind Labs | Jan 2021 - Present

· Built FastAPI services handling 12k requests per second backed by PostgreSQL and Redis.
· Migrated 40 services to Kubernetes with GitHub Actions pipelines, cutting release time by 60%.
· Led the design of an event-driven billing platform on AWS using SQS and Terraform.
· Mentored four engineers and introduced contract testing with pytest.

Software Engineer, Contoso Analytics | Jun 2018 - Dec 2020

· Developed Django REST APIs and Celery workers processing 2 million events per day.
· Optimized PostgreSQL queries, reducing p95 API latency from 900ms to 180ms.
· Containerized legacy services with Docker and automated deployments.

PROJECTS

· Open-source rate limiter: implemented a token-bucket middleware for FastAPI used by 300+ projects.
· Built an internal observability toolkit with OpenTelemetry and Grafana dashboards for 25 services.

SKILLS

Python, FastAPI, Django, PostgreSQL, Redis, Docker, Kubernetes, AWS, Terraform, GitHub Actions, pytest

EDUCATION

B.S. Computer Science, Cascadia State University, 2018
