SUMMARY

Python developer building reliable web backends for e-commerce and logistics teams.

EXPERIENCE

Backend Developer, Lumen Freight | Mar 2022 - Present
· Developed Django REST APIs for shipment tracking used by 150 enterprise customers.
· Designed PostgreSQL schemas, migrations and row-level security for a multi-tenant data model.
· Deployed services on AWS ECS with Docker and CloudWatch alarms.

Junior Python Developer, Brightcart | Jul 2020 - Feb 2022
· Implemented payment webhooks in Python and Flask with 99.9% delivery success.
· Wrote pytest suites that raised coverage from 45% to 85%.

PROJECTS

· Built a personal budgeting API in Python with SQLite and JWT authentication.

SKILLS

Python, Django, Flask, PostgreSQL, Docker, AWS, REST APIs, pytest, Git

EDUCATION

B.A. Economics, Riverbend College, 2020
Backend Web Development Certificate, Online, 2020
